## OAuth Client All Versions.

### How to Change Versions?

- In `./_autoload.php` Change constant `version` to any of the following
  - `mo_free_version`
  - `mo_standard_version`
  - `mo_premium_version`
  - `mo_enterprise_version`

### Automatic

- cd to `build/`
- Run command: `python build.py`
- You will find the zipped plugin in the same folder: `mo_oauth_client_<version>.zip`

### Manually

- Add/Remove the corresponding folder:
  - For `mo_free_version` remove `./classes/Standard`, `./classes/Premium`, `./classes/Enterprise` folders.
  - For `mo_standard_version` add `./classes/Standard` folders.
  - For `mo_premium_version` add `./classes/Standard`, `./classes/Premium` folders.
  - For `mo_enterprise_version` add `./classes/Standard`, `./classes/Premium`, `./classes/Enterprise` folders.

---

## TODO

- New UI
- Single Login Flow
